Canonical URI: <urn:ddi:int.ddi.cv:TypeOfNote:1.1.0>

Agency: [DDI Alliance](#)

Code list

Code value	Code descriptive term	Code definition
Processing	Processing note	A note related to the processing of the data, or metadata, or both.
Addendum	Addendum	Additional information, usually of a factual nature (as opposed to a comment), intended to clarify the content of a DDI section or module.
System	System note	A note generated by the processing system used to produce the data, or metadata, or both.
Observation	Observation	A note providing information on an aspect relevant for data usage that is likely to remain permanent, or a temporary note providing information for further review and correction. May be an observation entered by a human user or a system-generated note on any inconsistencies or deviations.
Comment	Comment	A human-readable comment, typically of a more subjective nature than an addendum.
Other	Other	Use when the type of note is known, but not found in the list.

Usage

[DDI-L 3.3](#)

Module name: reusable

Element name: [TypeOfNote](#)

[DDI-L 3.2](#)

Module name: reusable

Element name: [TypeOfNote](#)

[DDI-C 2.5](#)

Element/Attribute name: [notes@type](#)

In DDI 2.5 the element notes with its attribute @type is included in the content model of 21 elements:

[citation](#), [dataAccs](#), [dataDscr](#), [docDscr](#), [docSrc](#), [fileCitation](#), [fileDscr](#), [fileSrc](#), [invalrng](#), [method](#), [nCube](#), [nCubeGrp](#), [otherMat](#), [setAvail](#), [sourceCitation](#), [stdyDscr](#), [stdyInfo](#), [valrng](#), [var](#), [varGrp](#), [verStmt](#)
