CV notes:

This vocabulary was first published by the DDI Alliance. Please see: <https://ddialliance.org/controlled-vocabularies/all>.

Language: English (en)

Version: 1.0

Version notes:

Version changes:

Canonical URI: <urn:ddi:int.ddi.cv.TypeOfNote:1.0>

Agency: [DDI Alliance](#)

## Code list

| Code value  | Code descriptive term | Code definition   |
|-------------|-----------------------|---|
| Processing  | Processing Note       | A note related to the processing of the data, or metadata, or both.   |
| Addendum    | Addendum              | Additional information, usually of a factual nature (as opposed to a comment), intended to clarify the content of a DDI section or module.  |
| System      | System Note           | A note generated by the processing system used to produce the data, or metadata, or both.   |
| Observation | Observation           | A note providing information on an aspect relevant for data usage that is likely to remain permanent, or a temporary note providing information for further review and correction. May be an observation entered by a human user or a system-generated note on any inconsistencies or deviations. |
| Comment     | Comment               | A human-readable comment, typically of a more subjective nature than an addendum.   |
| Other       | Other                 | Use when the type of note is known, but not found in the list.  |
