

DDI Alliance Controlled Vocabulary for TypeOfNote

CV definition

Includes a typology of notes.

Details

CV short name: TypeOfNote

CV name: Type of Note

CV notes:

This vocabulary was first published by the DDI Alliance. Please see: <https://ddialliance.org/controlled-vocabularies/all>.

Language: English (en)

Version: 1.1.1

Version notes:

Processing, System: Descriptive term capitalization changed to conform to the other vocabularies. — To align with a new versioning system, this version has been automatically created by copying the previous version PUBLISHED-1.1.0.

Canonical URI: <urn:ddi:int.ddi.cv:TypeOfNote:1.1.1>

Agency: [DDI Alliance](#)

Code list

Code value	Code descriptive term	Code definition
Processing	Processing note	A note related to the processing of the data, or metadata, or both.
Addendum	Addendum	Additional information, usually of a factual nature (as opposed to a comment), intended to clarify the content of a DDI section or module.
System	System note	A note generated by the processing system used to produce the data, or metadata, or both.
Observation	Observation	A note providing information on an aspect relevant for data usage that is likely to remain permanent, or a temporary note providing information for further review and correction. May be an observation entered by a human user or a system-generated note on any inconsistencies or deviations.
Comment	Comment	A human-readable comment, typically of a more subjective nature than an addendum.

Code value	Code descriptive term	Code definition
Other	Other	Use when the type of note is known, but not found in the list.

Deprecated codes list

Usage

[DDI-L 3.3](#)

Module name: reusable

Element name: [TypeOfNote](#)

[DDI-L 3.2](#)

Module name: reusable

Element name: [TypeOfNote](#)

[DDI-C 2.5](#)

Element/Attribute name: [notes@type](#)

In DDI 2.5 the element notes with its attribute @type is included in the content model of 21 elements:

[citation](#), [dataAccs](#), [dataDscr](#), [docDscr](#), [docSrc](#), [fileCitation](#), [fileDscr](#), [fileStrc](#), [invalrng](#), [method](#), [nCube](#), [nCubeGrp](#), [otherMat](#), [setAv](#)
