**Version:** 1.1.1-PUBLISHED

**Canonical URI:** <urn:ddi:int.ddi.cv:TypeOfNote:1.1.1>

**Agency:** [DDI Alliance](#)

---

## Code list

Code value	Code descriptive term	Code definition
Processing	Processing note	A note related to the processing of the data, or metadata, or both.
Addendum	Addendum	Additional information, usually of a factual nature (as opposed to a comment), intended to clarify the content of a DDI section or module.
System	System note	A note generated by the processing system used to produce the data, or metadata, or both.
Observation	Observation	A note providing information on an aspect relevant for data usage that is likely to remain permanent, or a temporary note providing information for further review and correction. May be an observation entered by a human user or a system-generated note on any inconsistencies or deviations.
Comment	Comment	A human-readable comment, typically of a more subjective nature than an addendum.
Other	Other	Use when the type of note is known, but not found in the list.

---

## Usage
