Code List

Code value	Code descriptive term	Code definition
Processing	Processing note	A note related to the processing of the data, or metadata, or both.
Addendum	Addendum	Additional information, usually of a factual nature (as opposed to a comment), intended to clarify the content of a DDI section or module.
System	System note	A note generated by the processing system used to produce the data, or metadata, or both.
Observation	Observation	A note providing information on an aspect relevant for data usage that is likely to remain permanent, or a temporary note providing information for further review and correction. May be an observation entered by a

		human user or a system-generated note on any inconsistencies or deviations.
Comment	Comment	A human-readable comment, typically of a more subjective nature than an addendum.
Other	Other	Use when the type of note is known, but not found in the list.

Usage

DDI-L 3.3

Module name: reusable Element name: TypeOfNote

DDI-L 3.2

Module name: reusable Element name: TypeOfNote

DDI-C 2.5

Element/Attribute name: notes@type
